

USCO-SA

شركة المختصون المتحدون للمقاولات

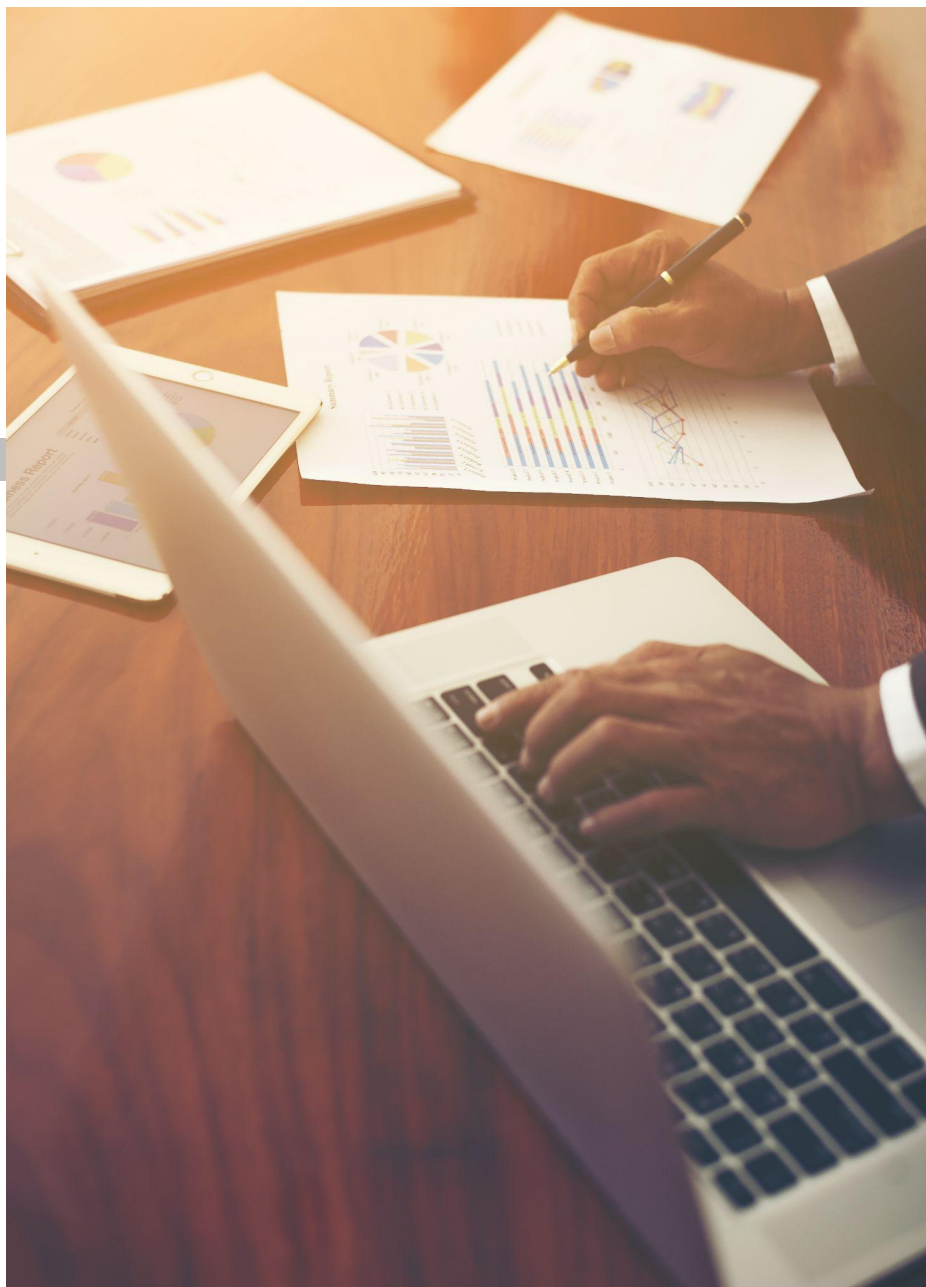

Forward from GM

We are moving into a fully connected and networked society where many civic and human functions are automated. Intelligent machines and fast processes rule.

Soon, some of the critical processes will be operated with minimum human interference, and the need for ultra-reliable machine networks, enhanced data security, and user experience will be of premium demand.

The rise of virtual reality will need an assured data transfer. Your future customer base will be fully connected and completely immersed in social media, e-commerce, and unsatisfiable hunger for fast information in the near five years.

Forward from GM

Our industries are evolving fast with technological challenges and ever-increasing demand for faster, more reliable solutions. It would be best to have a reliable partner that delivers efficient hardware, software, and solutions.

Are you ready for the coming of the intelligent configured society?

we are

Welcome to USCO.

Ahmed Al-Badri
General Manager

Welcome to United Specialists Company

Our mission was never us but you; our vision was never our success but of your service to your clients.

Our playbook is different. We build our solutions around what would drive your business forward, not adapting existing solutions to your needs.

We understand that you are in a "lead or lose" situation, with competitors coming from all sides and customers that are more and more shifting to the most straightforward solution and more convenient provider.

We know that new technologies come with disruptive factors that evolve fast. We are aware that customers are becoming more "liquid," they move between different eco-systems seamlessly. And we consider this when proposing and planning solutions.

Welcome to United Specialists Company

We have accumulated a successful track record in many industries such as governmental, telecom, hospitality, residential, banking, remote sites, malls, private companies, retail businesses, and more. We positioned ourselves as a reliable partner to our customers, and we believe in the future of telecommunication, data transfer, information processing, and automation.

Our mission is your business, and our vision is that your clients are satisfied, lucrative, and loyal.

Our tools are expertise, knowledge, innovation, and commitment.

7+ years of experience

100+ employees and professionals

15+ industries served

50+ projects delivered

Why work with us?

We make sure our clients are always aware of our progress. The more you are informed, the more appreciative you are of our service.

We are fully involved in our daily projects. We are always involved in our progress from senior to middle management, even on the ground level. We know the challenges, the obstacles, and how to solve them.

We make sure our different functions are constantly communicating and collaborating continuously.

We provide dedicated, continuously trained professional teams.

We comply with the highest standards in health and safety in the workplace.

Why work with us?

We provide detailed and structured information and training on all our solutions and technologies.

We have the most internationally recognized certifications available: ISO 9001:2015, ISO 14001:2015, ISO 45001:2018.

And finally, we have the best brains in the business, from the most strategic role to the most technical function.

Solar System

Did you know that our planet receives every hour enough solar energy to power our entire need for electricity for one year?

When we imagine the energy of the future, solar power is in the main picture.

At USCO, we strive for extreme efficiency, and our objective is to lead the solar revolution by making solar power accessible for companies and individuals in any situation. Solar power components are becoming more and more efficient and cheaper, bringing us closer to our ultimate goal: solar energy for everyone, everywhere.

PV solar panel, solar charge controller, inverters, water pumping system, swimming pool heating system, solar water heater, solar street lights.

Main Products

*Turn Keys Solar
System Projects*

- Solar Panels
- solar charge controller
- Inverters
- Batteries
 - Lead Acid
 - Lithium

Industries:

- Residential
- water pumping system
- swimming pool heating system
- Solar street lights
- solar water heater

Power & Telecom

Telecom energy managers have a daunting task in front of them. Mobile data traffic is moving towards almost exponential growth, so energy consumption and the global carbon footprint of our industry increase. With 5G expected to double your network energy consumption more, our responsibilities as telecom energy managers become even more critical.

At USCO, we focus on providing you with power telecom solutions for your actual needs while keeping future power needs in mind. Power telecom is evolving, and we run this process for you.

Main Products

*Turn Keys Power
Telecom Projects*

- DC Power Cabinet
- Rectifier Module
- Controller
- LVD
- Fuses
- Distribution
- Batteries
 - Lead Acid
 - Lithium
- UPS
- Generators

Industries:

- Telecom towers
- Data Centers
- Commercial centers

Surveillance & networking

USCO provides you with a wide range of premium products and professionals to achieve a safer and more secure environment at work, in residential areas, and in public spaces. Our surveillance networking technology is top of its line with variables and scalability.

On another concern, we also take care of your daily operations, stimulating significant cost savings, improving business insights, enhancing collaboration, and increasing efficiency. Our POS software solutions are versatile, customizable, and serve various industries.

Main Products

Turn Keys Surveillance & networking Projects

- Video Surveillance
- Access Control
- Commend & Control Room
- Video Management system
- Video Analytics
- Network Solution
- IP Based Audio Video

Industries:

- Banks
- Data Centers
- Commercial centers
- Malls
- Residential

Eaton power solution

For Data Centers

Rack mounted, tower, redundancy, modular types

Cameras

Monitoring & video analysts

All types of cameras and Video management system

Batteries

Lead acid & Lithium

High quality of batteries to use in solar and UPS system

OUR Partners

Axis Partner

*Monitoring & video
analysts*

All types of cameras and
Video management
system
